Here's my current problem: I want to now do cities And because I didn't want to spend more money for something I wasn't sure I was going to like, I procured a 'trial' version of City Designer 3--and was fairly unimpressed with the tools it adds to CC3.

I am absolutely IN LOVE with it for doing overland maps It took me about a week and a half of fairly steady work (2-3 hours a day at nights), and a fairly healthy dose of tutorials to really get the 'feel' for the software, but I now feel if not like a master, at least competent with its basic features.. Although we specialize in maps of fictional realms, as commonly used in both novels and games (both tabletop and role-playing), many Guild members are also proficient in historical and contemporary maps.. You will have to before you can post or view full size images in the forums This is my first real post on these forums, so first off, hello, and thanks so much to everyone involved with the site for providing such an amazing resource for us cartography enthusiasts.. Now I've looked at some cities done in Fractal Mapper 8 that didn't look super impressive--but they were competent, and the 'default' style seemed fairly appropriate to what I wanted to do for city maps.. The Cartographers' Guild is a forum created by and for map makers and aficionados, a place where every aspect of cartography can be admired, examined, learned, and discussed.

So, my question is, have I missed something cool with CD3 that I don't know about? Is it easier than I think to create/import new house styles that match what I want for maps? I thought City Designer 3 would be the next logical purchase for me, since I have already spent the time to learn CC3's interface, and CD3 is just an extension of it--but there's no reason to pay for tools if I can't get the artwork and texture styles in it (I'd just stick with CC3 flying solo).. One of the things that CC3 was awesome for in overland was the ability to quickly add textures to nearly anything on the map.. So for overland mapping and dungeon mapping, CC3 is exactly what I was looking for.. In this case, I'd rather put together a bunch of custom artwork as raster images, and import them in CC3 as a symbol set, and not even bother with CD3.. Yes, the house creation and easy 'street creation' tools were okay, but like a lot of cartography, it's not the tools, it's the artwork that's important. [Winzip For Os X 10.6](#)

For overland mapping, it's great, and for dungeon/battle grid maps, it's easy as pie, assuming you have good textures on hand (and with all of the free textures out there on the Interwebs, it's a piece of cake).. Now the real question: I recently purchased CC3, and for $45 00, it was a fabulous investment.. But I couldn't see a quick, easy way to add custom textures and objects to the house and street tools in CD3--meaning that if I didn't like the default symbols and artwork styles, it didn't seem like a worthwhile investment. b0d43de27c [Cnc Base For Prolight 1000 Download Free](#)
